

# Price Discrimination in Property and Liability Insurance (University of Minnesota Studies in Economics and Business)

Price Discrimination in Property and Liability Insurance was first published in 1959. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. This booklet provides a detailed study of the factors which enter into price discrimination in property and liability insurance. The regulations which control these insurance prices rest with the state governments and vary, therefore, from one state to the next. After discussing the question of what constitutes price discrimination in this field, Professor Williams examines the regulatory statutes of various states and the administration of these statutes. This is number 19 in the series, University of Minnesota Studies in Economics and Business.
